Oral health is an important part of overall health for both mother and child. Hormonal changes during pregnancy put pregnant women at higher risk for oral health issues. This disparity is exacerbated in low-income women, who may lack access to other key health supports. Research strongly suggests a link between gum disease and poor birth outcomes such as maternal high blood pressure, preterm delivery, and lower birth weight, which in turn increase overall health care costs. At present, low-income women who participate in Arizona's Medicaid program do not have access to comprehensive and affordable oral health care, despite several broadly-supported efforts by the legislature to provide this benefit. Would you support a comprehensive oral health benefit for pregnant women who participate in Medicaid?

Yes

8

Please explain your answer.

I fully support this proposal, it does make sense to protect mothers and kids oral health

9

How would you ensure oral health access is a priority in future state budgets?

I will bring the ideas to the table, and I will always listen stakeholders in this issue

10

What other actions would you take to promote oral health equity in Arizona?

I will fully support expanding benefits on oral health.
